产品介绍

水晶系列产品具有如水晶般的超高纯净度、闪烁度。具有如水晶般的超高纯净度、闪烁度。该系列产品以硅酸盐单晶片为基体，采用纳米级沉积包覆技术包覆多种金属氧化物，在高温下，结晶形成闪亮新型珠光颜料。

PRODUCT INTRODUCTION

Crystal pearl pigment series products get these very pure and high color chroma products with low heavy metal content. We use well-chosen high quality synthetic mica as substrate, careful process with micro morphology, precise control over its thickness ratio, and then coat it with metal oxides. In this way, this series products effect maintains. When applied, they will give to the end products a strong visual effect with their pure, clean, fresh color shade and bright pearly effect. And also due to their low heavy metal content, chemical stability and friendliness to environment, they are becoming the best choice for industries, which have high demanding for regulation compliance.
